Fullstack Développeur - Agence42

1.5 an (2019-2020)

Software Engineer - Freelance

7 ans (Début en 2018)

”

As **Lead developer** for Lucis I **owned the web platform** and **co-steered core technical decisions**, working directly with the CPTO.

Our goal was to deliver a proactive, human-centered health product powered by biomarkers and AI; I drove fast iteration while enforcing reliability, security, and trust: supporting the YC X25 pivot and investor readiness.

Software Engineer

- Developer specialized in JS : TypeScript, Node, Bun, Next.js, React.js, React native, Vue ;
- Other main technologies: LLM, RAG, SQL, MongoDB, GraphQL ;
